**Two-hour telephone lesson:** (usually in four half-hour sessions) You learn simple natural ways to reverse shortsightedness, longsightedness, squint, reading blur etc. You have a free initial telephone consultation to assess your specific needs. In each subsequent session you will be taught exercises and relaxation techniques to optimize your vision naturally. In collaboration with the teacher you will develop a program of exercises and relaxations, specific to your vision improvement needs.

**CD: Relaxing into Clearer Vision.** You are led through four relaxations. The first addresses your whole body, the second your external eye muscles, the third invites the parts of the inner eye to heal and the fourth addresses waking up your visual brain.

**CD: Clearer Vision.** You are taught exercises to improve your vision. A guided daily program of general vision exercises and relaxations is taught.

**Book: Natural Vision Improvement by Dr Janet Goodrich** This book is one of the classic texts for eyesight improvement

**Pinhole Readers:** Pinhole readers have been used through the ages to improve vision naturally. They are particularly good response to the "short arm syndrome" Pinhole Readers do NOT replace eye-checks from your optician or ophthalmologist. All proceeds from your Pinhole Readers go to the SEE AGAIN project that addresses blindness reversal in poverty stricken communities in Asia.
